

Cleaning Protocols

Cleanliness and attention to detail have always been our top priority: please be assured that we are following all state, federal, and CDC guidelines to make certain that you enjoy a safe and comfortable overnight stay with us. We practice a 24-hour passive decontamination between guests which allows us a full day to clean and disinfect before a guest room is next occupied.

Griswold Inn employees are subject to the “Connecticut Promise” and have been trained to maintain a safe work environment. All of our employees are required to wear Personal Protective Equipment to keep our team and our guests safe. We practice proper hand hygiene including wearing gloves when appropriate and washing frequently. We ensure that our employees are using EPA approved chemicals for cleaning that fight the Covid-19 virus.

In our guestrooms we pay particular attention to high-touch, hard non-porous items including alarm clocks, door and furniture handles, night stands, toilet and faucet handles, telephones, light switches, control panels, luggage racks, hangars and flooring. Pillows, mattresses and bedding are sanitized properly, along with the appropriate washing of linens, towels and other laundry, according to CDC guidelines. Per State guidelines our Housekeepers are not to enter any occupied room unless requested by the occupant.

If you have *any* questions concerning our protocol or what you may expect when you come stay with us, please don't hesitate to call, 860.767.1776.

We look forward to hosting you!
